

DANNY WASER

AI ENGINEER & FULL-STACK DEVELOPER

SWISS CITIZEN | 26 YEARS OLD | Lausanne, CH

danny@waser.tech | +41 (0) 78 911 98 34 | waser.tech | [LinkedIn](#) | [GitHub](#)

PROFILE

Passionate about conversational intelligence, I'm fluent in French, English and Spanish. With expertise in language model design and full-stack development, I specialise in improving the accuracy of speech transcription and creating conversational assistants. My ability to migrate and train AI models, combined with my experience in translation tools, make me a valuable asset for any AI company looking to innovate and optimise its solutions.

PROFESSIONAL EXPERIENCE

Data Scientist

Sep 2024 - Mar 2026

Idéal Isolation Sàrl & DF Innovation Sàrl

- **Idéal Isolation:** Strategic analysis of operational bottlenecks; development of data pipelines and predictive models to optimize quotation and invoicing workflows.
- **DF Innovation:** R&D in Generative AI (RAG, Fine-tuning), quantitative algorithmic trading, and Solana smart-contracts.

Engineer in Artificial Intelligence (AI)

Jan. 2024 - March 2024

Synthflow AI

- Rapid R&D and prototyping of multi-agent conversational systems for telephonic deployment.
- Iterative implementation of LLM-based dialogue managers and prompt engineering for real-time interaction.

Speech recognition developer

Nov. 2021 - Dec. 2022

Mozilla & Coqui-AI

- [Update of the CommonVoice French model training image](#)
- With Mozilla, we have re-implemented the DeepSpeech model training image with the STT (Speech-To-Text) project to continue transcribing French with our machines.
- [Migration from DeepSpeech to STT for the French-speaking pipeline](#)
- With Coqui-AI, we have implemented various improvements to the STT project to enable training of French-speaking models.
- [Training new speech transcription models](#)
- Finally, I published new models for French, using 2x as much higher quality augmented data in order to reduce the average word error rate by 10%.

AI Developer & Founder (Entrepreneurial)

Jan. 2020 - July 2023

Waser Technologies

- [Multi-modal language translator](#): High-performance translation tool leveraging local LLMs.
- [Local, real-time voice transcription and speech synthesis](#): Low-latency processing using Faster-Whisper and OpenVoice.
- [Natural language system orchestrator](#): AI-powered shell for seamless system interaction.

SOFTWARE PROJECTS

Hugging Face Profile: Official Hugging Face profile hosting open-source LLMs, speech models, and specialized AI datasets.

Assistant: Multi-agent LLM shell orchestrating specialised agents for system ops, web research, and file editing via a natural language prompt.

Listen: Real-time speech-to-text system with server-client architecture using Faster-Whisper and VAD for efficient audio transcription.

Say: Text-to-speech tool generating high-quality customizable voices from 10-second audio samples using OpenVoice v2.

Translator: Batch-friendly translation CLI leveraging Hugging Face NLLB-200 with full support for metadata-preserving PO file handling.

TECHNICAL SKILLS

IA & Frameworks: PyTorch & TensorFlow, Transformers (Hugging Face), RAG & LLM Orchestration, Automatic Speech Recognition (ASR), Text-to-Speech (TTS)

Languages: Python, Bash & Zsh, JavaScript (Node.js), HTML & CSS

DevOps & Tools: Docker, GNU/Linux Administration, Git, Cloud Infrastructure (Jelastic)

Libraries: Django, Prompt Toolkit

CERTIFICATION / EDUCATION

- **Google Advanced Data Analytics Professional Certificate** (Google @ Coursera, Oct. 2023-Nov. 2023)
- Commercial Diploma (CFC + MPC) (École de Culture Générale et de Commerce, Aug. 2014 - July 2017)

LANGUAGES

French (C2), English (C1), Spanish (C1), German (B1)

PERSONAL INTERESTS

Fan of astronomy, space opera, mountain trails, conscious slam, epic adventures
